

GROOVING KEEPS YOUR LIVESTOCK...**LIVE STOCK**

Grandview Concrete Grooving Inc. has over 26 yrs experience, specializing in concrete diamond pattern cut safety grooving for cow comfort on new and existing concrete floors. Our cut grooves act like tile drains in 2 directions @ 4" centers.

GCG Diamond pattern concrete grooving assures the cows the cleanest, driest, safest and most comfortable walk from the feed bunk to her stall (where milk is really made) with zero future maintenance at a very economical price.

A flat floor provides a secure hoof friendly surface, a large non-abrasive wear and contact pad between the grooves. The sharp square grooves stay in place for the life of the floor.

Standing on top of 8-year-old sand barn skid steer scrapped grooves (our customer) estimates that there is still 1/4" depth left & still sharp.... (they are) happy and says there is not likely anybody scrapes more than they do with steel blade buckets.

WE CUT **NON-SKID** FLOORS FOR DRY HEALTHY HOOVES

Some of the added benefits of diamond wheel grooving are:

- grooved floors dry off faster
- cows show heat because the superior traction does not inhibit mounting
- the required movements of stepping up, stepping down, walking, turning and mounting are supported
- older high producing cows stay in the herd longer
- safer walking surfaces for people

Rubber floors:

- 4x the price
- slippery when wet
- harbour bacteria
- do not last

Hammered or textured floors

- compromises the concrete
- creates sharp edges
- grinds cow's hooves resulting in sore feet
- scraper will buff floor to smooth in six months

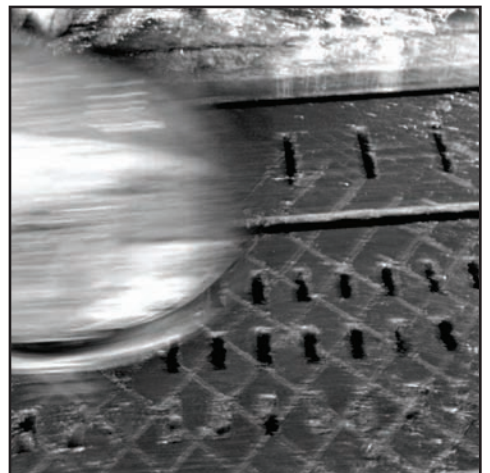

In sand barns - 2 things stand up to sand - concrete and grooving

"BEAUTIFUL JOB! THANKYOU VERY MUCH!"
James McDiarmid, Osgoode Ontario ph: 613-774-3220

"GROOVING IS EXCELLENT!"
Ron Forbes, Sarnia ON 519.337.6850

"I am really glad we grooved as it makes a big difference & it is still working great after 8 years"
Gord Versteeg, Wingham ON ph: 519.357.4476
